

Says

What have we heard them say?  
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?  
What other thoughts might influence their behavior?

usually work in laboratories or other research environments where they help design and implement trials and experiments and analyse the results

Scientific thinking is the pocess reviewing ideas using science observtaion ,investigation processes, and testing them them to gain knowlege

To scure a research scientist role ,employers typically expect candidates to attend an interview and answer a range of questions that assess their skills

The goal is to make outcomes of knowledge that may be meaningful to science

research scientist

Research scientists are responsible for designing undertaking and analsing information from controlled labortory based investingations ,experiments and trials

scientists-research are postions that may involve lab work and or direct patient care activities

The work is hard and the standards are rigorous ,but most researchers agree that their work is rewarding so you will enjoy what you do , and hopefully you will even find a way to express that through your work

Most researchers reported having pride in their institutions and passion for their work,but spoke of high personal toll of their environmentt

Does

What behavior have we observed?  
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?  
What other feelings might influence their behavior?
